Subject: RE: Cr(VI) and its toxicity

Dear Alexander,

I hope all is well there too. My brother and his wife moved to Germany recently to escape the Covid-19 chaos here, so hopefully it doesn't follow them.

We do not have any new scientific work to share. We are developing the draft assessment and published a protocol in 2019:

https://cfpub.epa.gov/ncea/iris_drafts/recordisplay.cfm?deid=343950

Here is a direct link to protocol download: http://ofmpub.epa.gov/eims/eimscomm.getfile?p_download_id=538034

As per our protocol, we are currently in the process of systematically reviewing data and models (including our own models). The process is not complete yet.

Your email address is on our list to receive Cr(VI) updates, so you will hear information as it becomes public.

Thank you for reaching-out.

-Alan

Subject: Cr(VI) and its toxicity

Dear Alan,

I hope you're doing fine despite the Covid-19 chaos.

We are still discussing a reevaluation of the chromium guideline value in Germany. Do you have any new models that do not support the value of 270 ng/l that we were discussing at the Berlin meeting in 2016? If so, could you please provide as with the respective data?

Many thanks in advance and stay healthy!

Best regards

Alexander
